# [CORPORATE EMAIL SERVICE DETAILS]

Technical Details of Corporate Email Service from Track Innovative Technologies Ltd.

## Technical Specifications of Corporate Email Service:

### **The Largest Cloud Email Solution Provider of the Country.**

Whether it's 5 or 5,000 mailboxes, we are the most affordable solution for you

### **Technical Details of Corporate Email Services:**

Sl No.	Service Name	Service Description
1.	<b>Business email for your domain</b>	Project a professional image with branded email (username@yourcompanyname.com) for your company. Keep your existing email addresses, plus setup unlimited email aliases (sales@yourcompanyname.com).
2.	<b>Email Sync.</b>	Everyone can keep email in sync between the web, mobile devices, Outlook and Mac. Always find the latest! Large storage – up to 25GBs per mailbox.
	<b>Webmail</b>	<p>The Webmail feature provides web based access to your email accounts and more importantly the ability for email account owners to perform key actions on their accounts.</p> <p>The Webmail interface provides the following functionality:</p> <ul style="list-style-type: none"> <li>• Email filtering</li> <li>• Delivery Reports</li> <li>• Password Modification</li> <li>• Ability to create and modify Auto Responders</li> </ul>
3.	<b>Email on mobile devices, even without a connection</b>	We have our own powerful Android app. Across mobile and desktop, you can read and draft messages when you don't have Internet, and they'll be sent when you're back online.
4.	<b>Account Level Filtering</b>	<p>The Account Level Filtering feature, allows the email owner to create filters on the default account. This allows emails that meet certain criteria to be treated in specific ways.</p> <p>Email owners can create a filter that moves email that meet the criteria in the following areas:</p>

		<ul style="list-style-type: none"> <li>• From address</li> <li>• Subject of the email</li> <li>• To address</li> <li>• Reply address</li> <li>• Body of the email</li> <li>• Any header</li> <li>• Any recipient</li> <li>• Has not previously been delivered</li> <li>• Is an error message</li> </ul> <p>Any of these fields can be set against custom fields using a comprehensive set of operators. These messages can then be:</p> <ul style="list-style-type: none"> <li>• Discarded</li> <li>• Redirected</li> <li>• Failed with message</li> <li>• Stop Processing rules</li> <li>• Delivered to folder</li> <li>• Piped to a program</li> </ul>
5.	<b>Spam Firewall Xeams</b>	<p>Xeams Spam filter email engine is developed using Java. Other open source software like Apache Tomcat- A web server used for the administrator console and Derby Apache – which provides an embedded JDBC, a relational database that is used for reporting purposes is also used.</p> <ul style="list-style-type: none"> <li>• <b>99% spam protection</b> - Xeams can block 99% percent of all junk messages right out of the box. The filtering rules are fully customizable and get better as Xeams adapts to your email environment.</li> </ul>
6.	<b>CSF (ConfigServer Security &amp; Firewall)</b>	<p>ConfigServe Firewall, also known as CSF, provides better security for your email while giving you an easy to use, advanced interface for managing your firewall settings. CSF configures firewall to lock down public access to services and only allow certain connections, such as logging in to FTP, checking your email, or loading your websites.</p> <p>ConfigServe Firewall also comes with a service called Login Failure Daemon, or LFD. LFD watches your user activity for excessive login failures which are commonly seen during brute force attacks. If a large amount of login failures are seen coming from the same IP address, that IP will immediately be</p>

		temporarily blocked from all services on your server. These IP blocks will automatically expire and can also be manually removed.
9.	<b>Privacy always in Mind</b>	Unlike many other providers, we help keep your business email private with a strict ad-free policy.

## Screenshots:

### Login Screen

## Email Body

The screenshot displays an email client interface. On the left, a sidebar shows folders like 'Inbox', 'Sent', 'Drafts', 'Spam', 'Trash', 'Archive', and 'User Folder 1'. A search bar is active with the results for 'CNET'. The main email content is from CNET, dated February 28, 2014, with the subject 'Xbox 360 Games from \$3, Survival Gear 50% Off, Oakley Sunglasses 50% Off, ...'. The email body features several promotional sections: 'Xbox 360 Games from \$3, Survival Gear 50% Off, Oakley Sunglasses 50% Off, ...', 'Survival Gear at ThinkGeek: Up to 50% off, deals from \$2 + \$6 s&h', and 'Oakley Sunglasses Sale: Up to 50% off, deals from \$20 + \$4 s&h'. A context menu is open over the email, listing actions such as Reply, Forward, Edit as New, Forward as attachment, Archive, Spam, Delete, Print, View in separate window, Show Source, and Download as .eml file.
